

JEAN PIERO PARRA BUSTAMANTE

Junior Software Developer / Frontend Developer | React

Cali, Colombia | pjeanpiero777@gmail.com | +57 3173341323

PROFESSIONAL SUMMARY

Junior Software Developer focused in React, JavaScript and TypeScript with experience building responsive web applications, creating user-focused interfaces, and leveraging AI-assisted workflows to accelerate product development. Experienced in creating reusable components, integrating external APIs, optimizing user interactions, and delivering complete projects from concept to deployment.

Passionate about transforming ideas into functional products through React, JavaScript, and continuous learning.

SKILLS

- **Fronted Development:** React, JavaScript, TypeScript, Express, Node.js, Supabase, Component-Based Design, Reusable High-Quality UI Components, API Integration, State Management Fundamentals.
- **Soft Skills:** Problem Solving, Communication, Adaptability, Product Thinking, User-Centered Mindset.
- **Tools:** Git, GitHub, VS Code, Vite, Chrome DevTools, Postman.
- **Learning & Expanding:** TypeScript, Tailwind CSS, Vitest, Testing Library.

PROJECTS

HEXAGON DESIGN LANDING PAGE | Product-Oriented Frontend Project

I designed and developed a responsive web experience using React and Vite, focusing on interface structure, usability, and responsive behavior across screen sizes. Also, I built an integrated backend with Node.js, Express, and Supabase, connecting the interface with backend services through REST APIs. Furthermore, I developed an authenticated admin

dashboard for managing contact submissions, implementing interface states, and troubleshooting issues across the frontend and backend.

GitHub: [Hexagon Design GitHub Repository](#)

Product Explorer

I built a product browsing interface consuming the FakeStore REST API, implementing filtering, pagination, and dynamic product rendering. I also managed application state and API interactions through reusable React components and custom hooks, including loading and error states.

I focused on responsive interface behavior and clear user interactions while handling asynchronous data and API failures.

PROFESSIONAL EXPERIENCE

Independent Software Engineering Projects/ 2025 – Present

- Built and maintained High-Quality React applications consuming REST APIs.
- Implemented reusable components and custom hooks for clean architecture.
- Managed asynchronous data and UI states (loading, error, empty).
- Focused on performance and user experience in real-world scenarios.

Customer Support Specialist – Bancolombia Campaign (Konecta) / Oct 2024 – Dec 2025

Provided technical and customer support via phone, email, and chat. Diagnosed customer-reported issues, investigated account incidents, guided users through technical troubleshooting, documented resolutions, and consistently met quality and customer satisfaction KPIs.

Store Manager – Movies Shop / Sep 2023 – Jun 2024

- Led store operations and team performance.

- Reduced losses by 40% and optimized internal processes by 90%.

EDUCATION

Technical Degree in Accounting and Finance | 2008

Accounting Studies (Incomplete) | 2016

LANGUAGES

Spanish: Native

English: Intermediate B2 – Technical Documentation and Professional Communication
